

*“We plan to use SRS for another project similar in size and scope in the next 8-12 months.”*

*– Deborah Reif, Corporate Compliance Officer Southeast Alabama Medical Center*

# 180,000 FILES

## APPLICATION

Southeast Alabama Medical Center (SAMC) in Dothan, Alabama is a not-for-profit community health system with 420 beds and 2700 staff serving Southeast Alabama, Southwest Georgia, and North Florida.

## CHALLENGE

SAMC stored 180,000 charts for 25 years until the Corporate Compliance Officer, Medical Records Director, and Facilities Director teamed up to find a better solution. They began searching for a company to scan all of their files.

## SOLUTION

SRS was engaged to find a less-expensive solution than scanning it all. SRS studied their system and found that 93% of files were eligible for destruction, but someone would need to sort them, file by file. The project would cost 20% of the original budget to scan it all.

## RESULT

“SAMC recovered 10,000 square feet, eliminated the liability of records that met their retention, and has a HIPAA compliant solution for storing & scanning the remainder at 20% of the cost to scan it all,” says Corporate Compliance Officer Deborah Reif.
